Share your PC files or search online important material during your presentation displayed on your HDMI TV in high definition

Taipei, Taiwan - May 1st, 2011 - KWorld Computer Co., Ltd., a leading provider in integrated multimedia player today announces its latest design in multimedia converter - PT220-VH. KWorld has created this media converter to proportionate a multi-use function in your daily life at work or at home. This converter has very easy and convenient features that will allow you to share any PC files or search on the internet displayed on your HDMI TV in high definition while you are presenting or just sharing with your loved ones.

PT220-VH will allow you more convenience for watching all your files on the big screen in the comfort of your living room or at your office for important meetings. You will be able to transmit your notebook image into your wide display TV with a high resolution up to 1920*1200 60Hz by using VGA input of our converter. PT220-VH will allow you to convert your notebook VGA input into your HDMI TV output

KWorld has enhanced the feature of Plug and Play to give you the convenience of not needing to install any software. It is a great opportunity to easily connect your converter from your PC to your HDMI TV without the complicated process of installing any software. Meanwhile, in the package contents, 1.5M HDMI cable is contained for easy connection. KWorld PT220-VH will also let you have digital picture enhancement by displaying more colorful, bright and sharp pictures. You will also enjoy the convenience of not needing power adapter! Use the friendly environment USB power cable.

KWorld Home Media Center brings more multimedia entertainment into users' living room and at the office to share their passion, creativity and expertise with their family, friends and coworkers. It makes it so easy for users to watch different files and search on the internet directly on your HDMI TV, turning your living-room or office into a media center! PT220-VH is available for media request now.
